

8/13/2008 – Weekly CAMU Meeting Summary

Randy Cook from Cleveland Wrecking stated IRS Environmental would be on site August 20, 2008 to begin cleaning the Acid Plant area. Once the Acid Plant area has been cleaned, Cleveland Wrecking will begin demolition of the Acid Plant on September 2, 2008. Randy also indicated he would like to begin demolition of the Bag House immediately after completing demolition of the Acid Plant.

A question arose about the Galbestos siding that will be removed from the Acid Plant area. Mark Rhodes indicated this siding will need to be treated exactly the same way the other Galbestos siding was treated. The Galbestos siding will need to be placed in the same location as the other Asbestos material and covered within 24 hours of placement in the CAMU cell. Because of this, we will need to stack the Galbestos siding in the plant area until there is a sufficient amount of demolition debris available to properly cover the Galbestos siding.
